

Call for research project in medico-surgical cardiology 2022

March 24 th, 2021.

Dear Professor, Dear Doctor,

The **Foundation for Cardiac Surgery** (Fonds pour la Chirurgie Cardiaque - Fonds voor Hartchirurgie) strives to promote progress in surgical and/or medical cardiology by dedicating sponsorship resources to finance research projects in this domain.

Like every year, the Foundation for Cardiac Surgery is launching its call for projects.

Interested researchers must obligatorily belong to one of the country's University institutions. They can apply for the Foundation's support by presenting their application file before January 31, 2022 at the latest.

The documents must be written in English, and will include:

- > a brief presentation (3 pages maximum) of the intended research. If applicable for the project, it will be submitted for approval to the Committee of Ethics.
- > if there are, related references of articles published by the author(s);
- > a short C.V.
- > a detailed budget (incl. VAT) required by the project.
If relevant, specify alternative financing.

The application file will be sent to the Foundation exclusively by electronic mail to eliane.fourre@hart-chirurgie-cardiaque.org. They will be examined by the Foundation's Scientific Council. Selection will be ended for March 31, 2022 and the authors will be immediately informed.

Please be kind to forward this call to concerned research services.

For any additional information, please contact Eliane Fourré at 02 644 35 44.

Best regards,

Professor Jean-Louis Leclerc,
President
